

The Economical Two suiter and the Jump two suiter

The choice between Economical/ Jump Two suiter bid

- The two suiter bid is 'economical', When the second suit bid is lower than the repetition of the first.
- The jump two suiter : The opener bids his second suit at a level above the lowest level at which it could have been bid (... jumping a level).
- The economical two suiter bid is not forcing : could very well pass after you've bid your second suit.
- The 'Jump' two-suiter is forcing to game : neither you nor your partner can pass until game has been reached.
